LeetCode GeeksforGeeks

Education

Jaypee Institute of Information Technology, Noida

2024 – 2028

B.Tech in Computer Science and Engineering

CGPA: 7.9 (till 4th sem)

Divine Educational Institute, Bulandshahr

2019 – 2022

Class 12: 94.6% Class 10: 88.2%

Relevant Coursework: DSA, OOP, DBMS, AI, ML Fundamentals , Data Analysis , Full Stack Development

Skills

- **Languages:** C, C++, Java, Python
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Software Engineering
- **Web Technologies:** HTML, CSS, JavaScript, PHP, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Unix/Linux
- **Concepts:** Cryptography, Graph Algorithms, Dynamic Programming, Machine Learning Fundamentals , Data Analysis
- **Problem Solving:** 400+ coding problems solved across LeetCode, GeeksforGeeks and Coding Ninjas , including 300+ problems on LeetCode.

Projects

AI Resume Analyzer and Skill-Gap Finder

GitHub

Tech Stack: Python, Machine Learning, NLP, Streamlit, PDF Parsing

- Developed an AI-assisted resume analyzer to evaluate resumes and generate ATS-based feedback.
- Implemented skill-gap analysis by identifying missing technical skills from uploaded resumes.
- Automated resume parsing and recommendation generation to improve resume-job matching.

Advanced Cryptography Suite (C++)

GitHub

Tech Stack: C++, Cryptography, STL, Graph Algorithms

- Developed a cryptography suite implementing RSA, Diffie-Hellman, Hashing, Merkle Tree, Hill Cipher, and File Security.
- Implemented encryption, key exchange, data integrity verification, and matrix-based cryptographic techniques.
- Applied graph algorithms and dynamic programming concepts to demonstrate secure communication.

Car Price Predictor (Machine Learning)

GitHub

Tech Stack: Python, Pandas, NumPy, Scikit-Learn, Flask, HTML, CSS

- Developed a Machine Learning model to predict car prices based on company, model, year, fuel type, and kilometers driven.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on the dataset.
- Trained and evaluated a Linear Regression model for price prediction.
- Built and deployed a Flask-based web application for real-time car price estimation.

Achievements

- Solved **400+ DSA and algorithmic problems** across LeetCode, GeeksforGeeks, and Coding Ninjas.
- Secured **2nd Position** in the IEEE Hub Coding Contest at Jaypee Institute of Information Technology.
- Participated in college-level hackathons and coding competitions, contributing to innovative technical solutions.

Certifications

- **Technology Job Simulation – Deloitte (Forage)** Dec 2025 [View Certificate](#)
- **HackerRank: Problem Solving (Basic)** [View Certificate](#)
- **HackerRank: SQL (Basic)** [View Certificate](#)
